1. Click on File -> Make a copy

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	digits	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
The user get to input two-digits number	The program will start to get how many tens in the number,once done that.The program will times the number of tens to get the tens place digit,and subtract the origin number by the tens place digit to get ones place digit.	The program will output the tens place digit and one place digit.
