

1,user input place

```
public static void main(String[] args) {  
    Scanner input = new Scanner(System.in);  
    System.out.println("Enter the change in cents: ");  
    int change = input.nextInt();  
    input.close();  
}
```

2,program process place

```
int quarters = change/25;  
int remainder = change%25;  
int dimes = remainder/10;  
int remainder1 = remainder%10;  
int nickels = remainder1/5;  
int remainder2 = remainder1%5;  
int pennies = remainder2/1;
```
